INDUSTRIAL SAFETY POLICY

Joint Stock Company "Chepetsky Mechanical Plant" is aware of its responsibility for the possible negative manifestation of the results of the operation of hazardous production facilities and expresses confidence that these activities should and can be carried out without incidents and accidents.

Joint Stock Company "Chepetsky Mechanical Plant" considers the main goal of activities in the field of industrial safety to ensure the protection of the vital interests of the individual and society from accidents at hazardous production facilities and their consequences.

No considerations of an economic, technical or other nature can be taken into account if they contradict the need to ensure the safety of workers in the workplace, the public and the environment.

The goals of the enterprise in the field of industrial safety are:

- ensuring the level of industrial safety at which the risk of incidents and accidents is minimal and corresponds to the level of engineering and technology development;
- creation of a system for preventing the occurrence of failures or damage to technical devices, deviations from the specified operating modes that can lead to accidents at hazardous production facilities;
- observance of the priority of measures to prevent incidents and accidents at hazardous production facilities of the enterprise over measures to eliminate the consequences of these events; striving to fulfill all industrial safety requirements during the operation of hazardous production facilities.

Basic principles of the enterprise in the field of industrial safety:

- compliance with industrial safety requirements;
- recognition and ensuring the priority of life and health of workers in production, of the population, in relation to the results of production activities;
- ensuring the continuous functioning and improvement of the industrial safety management system, which is part of the overall enterprise management system;
- striving to achieve understanding among all employees of the enterprise that compliance with industrial safety requirements is an integral part of work, as well as ensuring their personal safety.

To achieve the goals and implement the basic principles of activities in the field of industrial safety, the enterprise undertakes the following obligations:

- to provide activities in the field of industrial safety and the industrial safety management system of the enterprise with all necessary resources (financial, human, material);
- to carry out the updating of technological processes and modernization that have fulfilled the standard service life of technical devices at hazardous production facilities in order to bring them in line with industrial safety requirements, observing the principle of priority replacement of technical devices, before extending the service life;
- to ensure the adoption of all management decisions related to the operation of hazardous production facilities, with the obligatory consideration of hazardous factors associated with the planned activity, or manufactured products and services rendered;
- strictly observe and implement industrial safety requirements in the system of local regulatory and technical documents of the enterprise;
- to analyze newly introduced legislative and other normative legal acts and normative and technical documents in the field of industrial safety, to provide information to managers and specialists;
- to pursue an effective personnel policy based on high-quality selection and placement of managers and specialists who are able and striving at a high professional level to strictly comply with industrial safety requirements, as well as on the principles of continuous improvement of the technical level of personnel;
- to introduce and improve an early warning system for the possibility of incidents, accidents at hazardous production facilities that pose a potential hazard, and ensure the prompt implementation of a set of preventive measures aimed at eliminating potential risks;
- to assess the risks of accidents, ensure the development, implementation and control of measures to reduce them, as well as insurance of civil liability of the owner of a hazardous production facility for damage caused by an accident at a hazardous facility;
- to inform and maintain an open dialogue about the activities of the enterprise in the field of industrial safety with all interested parties;
- to analyze and adjust the Policy to ensure continuous compliance with changing conditions.

Each employee of CMP, JSC undertakes to ensure the implementation of Industrial Safety Policy.
